¹ The price for the recipient of donated oocytes includes the compensation fee for the egg donor, a set of complementary procedures and services, and the 1st embryo transfer. The price does not include the additional cost for medication to stimulate the donor's ovulation. Other outpatient and laboratory procedures are charged according to the current price list.

² The price for the recipient of donated embryos includes the fee for managing the preparation of the recipient and the fee for the cryoembryo transfer.

³ GYN-FIV benefit – the price for examinations, stimulation, and oocyte retrieval (including anesthesia) for patients continuing treatment within one cycle. This is determined by the doctor and embryologist based on the results.

⁴ GYN-FIV benefit – for continuing treatment within one cycle, determined by the doctor and embryologist based on the results.

⁵ The UNION insurance benefit is paid to the clients only after it is approved by the insurance company, and it is then paid to the insured person's account.

⁶ GYN-FIV benefit applies to patients with oncological or other conditions whose ongoing treatment causes irreversible damage to sperm or oocytes.

⁷ In case a laboratory method is not used, the full amount for the unperformed procedure will be refunded to the patient.

The price for transporting genetic material to another facility for patients who have received the freezing and storage benefit is determined individually according to the valid internal guidelines of GYN-FIV.

The prices listed in the price list for individual procedures are final, and payments are made on the day the treatment begins at the reception of GYN-FIV.

The prices for medications and other procedures performed outside of GYN-FIV are not included in the procedure prices. During treatment, clients have the right to change their attending physician.
